

# NBRC Annual School Summary

Report as of 9/23/2010

This percent is of # attempting, not of total graduates, which is the CoARC denominator. So often there is confusion as to why a program does not meet the CoARC Threshold, but has the "right" percent on this report.

CoARC computes the CRT Credentialing Success as follows:  
 Total number of credentialed graduates ÷ by the total number of graduates for a 3-year moving average.

For example:  $5+17+2 \div$  by total number of grads for 2010+2009+2008.

Tentatively, for the 2011 Report of Current Status (RCS), that average would be for grad years 2010, 2009, 2008. The Commission has not made its final decision.

The NBRC report does NOT show total number of graduates, only the number of graduates who attempted the exam(s).
