**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

80 **About CoARC**

81 The Medical Society of the State of New York formed a Special Joint Committee in  
82 Inhalation Therapy on May 11, 1954. One of its purposes was "... to establish the essentials of  
83 acceptable schools of inhalation therapy (not to include administration of anesthetic agents) ..."  
84 In June 1956, the House of Delegates of the American Medical Association (AMA) adopted its  
85 Resolution No. 12, introduced by the Medical Society of the State of New York. The delegates  
86 "Resolved, that the Council on Medical Education and Hospitals is hereby requested to endorse  
87 such or similar 'Essentials' and to stimulate the creation of schools of inhalation therapy in various  
88 parts of these United States of America." A report entitled, "Essentials for an Approved School of  
89 Inhalation Therapy Technicians," was adopted by sponsor participants (American Association for  
90 Inhalation Therapy [AAIT], American College of Chest Physicians [ACCP], American Medical  
91 Association [AMA], and American Society of Anesthesiologists [ASA]) at an exploratory  
92 conference in October 1957. The AMA's House of Delegates granted formal approval in  
93 December 1962. The first official meeting of the Board of Schools of Inhalation Therapy  
94 Technicians was held at AMA's Chicago headquarters on October 8, 1963.

95  
96 The Joint Review Committee for Respiratory Therapy Education (JRCRTE), the successor  
97 group to the Board of Schools came into being on January 15, 1970 as a recommending body to  
98 the Committee on Allied Health Education and Accreditation (CAHEA) of the AMA. The JRCRTE  
99 was dissolved in 1996 and the Committee on Accreditation for Respiratory Care became its  
100 successor organization, as a recommending body to the newly formed Commission on  
101 Accreditation for Allied Health Education Programs (CAAHEP). In 2008, the Committee on  
102 Accreditation for Respiratory Care began the process of becoming an independent accrediting  
103 body: the Commission on Accreditation for Respiratory Care (CoARC). The CoARC became a  
104 freestanding accreditor of respiratory care programs on November 12, 2009 and in September  
105 2012, the Council for Higher Education Accreditation (CHEA) granted recognition to the CoARC.

106  
107 **CoARC's Mission**

108 The mission of the CoARC is to ensure that high quality educational programs prepare  
109 competent respiratory therapists for practice, education, research, and service.

110  
111 **The Value of Programmatic Accreditation**

112 Accreditation provides consumer protection, advances and enhances the profession of  
113 Respiratory Care, and protects against compromise of educational quality. Accreditation also  
114 supports the continuous improvement of these educational programs by mandating continuing  
115 reassessment of resources, educational processes, and outcomes.

116

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

**INTRODUCTION**

The practice of Respiratory Therapy has become much more complex in recent years with advancing technology and a need to contribute as team members with skills in leadership, communication, evidence-based inquiry, and an expanded knowledge of cardiopulmonary disease management. To keep pace with a rapidly changing health care environment, the Respiratory Care profession recognizes the need to advance the level of education of its workforce. Fostering degree advancement by the working Respiratory Therapist is an essential part of this effort. Currently, over 80% of entry to practice programs are at the associate level, so educational programs that allow the working associate level therapist to advance to the baccalaureate and/or master level will be required for the workforce to accomplish the goal. Respiratory Therapy Degree Advancement programs arose in the early 2000s to meet this need. They were based on similar programs in Nursing that advanced the RN to the BSN. In 2015, CoARC recognized the need to accredit these programs to ensure transparency for prospective students, curriculum that serves the need of the profession, and external validation of program quality.

CoARC Accreditation Policy 12.03 defines a degree advancement program in Respiratory Care as “*an educational program designed specifically to meet the needs of practicing respiratory therapists with an RRT who, having already completed an accredited respiratory care program with an entry into respiratory care professional practice degree, wish to obtain advanced training in Respiratory Care.*” The CoARC and its collaborating organizations work together to establish, maintain, and advance Standards which constitute the requirements to which an accredited degree advancement program in respiratory care is held accountable and provide the basis on which the CoARC will confer or deny program accreditation.

These Standards are designed to acknowledge the “value-added” by degree advancement programs above and beyond the *entry into respiratory care professional practice (Entry)* degree. *Entry* programs that desire to offer an advanced degree to individuals who already have an ASRT or BSRT can apply for accreditation of their degree advancement program as can sponsors offering a free-standing degree advancement program.

Degree advancement programs are different from *Entry* programs in purpose, design and content. *Entry* programs provide individuals who have no respiratory care background or experience with the competencies needed to enter the profession, whereas degree advancement programs expand the depth and breadth of both knowledge and skills *beyond* those of an RRT entering the profession.

Advanced educational experiences, designed to enhance a respiratory therapist's ability to function in clinical, teaching, administrative, or research environments, are essential components of degree advancement programs in respiratory care. While minimal course content and resource requirements are specified in this document, flexibility and innovation in curricular development are encouraged.

Development of an effective degree advancement program requires a thorough

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

162 assessment of the education experiences typically offered at the *Entry* level. Degree  
163 advancement programs will be able to use this foundation to develop new, advanced, in-depth  
164 educational experiences designed to enhance a respiratory therapist's professional practice. Each  
165 program must be able to demonstrate specific contributions to the advanced education of  
166 respiratory therapists.

167  
168  
169

DRAFT

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

170 **ELIGIBILITY**

171  
172 The CoARC accredits degree-granting programs in respiratory care that have undergone  
173 a rigorous process of voluntary peer review and have met or exceeded the minimum  
174 accreditation Standards set by the CoARC. To become accredited by the CoARC, degree  
175 advancement programs must be established as defined in Standard DA1.1 – either in U.S.  
176 accredited postsecondary educational institutions, by a consortium of which one member must  
177 be a U.S. accredited postsecondary educational institution, or in facilities sponsored by the U.S.  
178 military. Sponsors must apply for accreditation as outlined in the CoARC’s Accreditation Policies  
179 and Procedures Manual (available at [www.coarc.com](http://www.coarc.com)).

180  
181 All degree advancement students must have graduated from a CoARC-accredited *Entry*  
182 *into Respiratory Care Professional Practice* degree program prior to admission. Additionally,  
183 students who do not have the RRT credential upon admission to the program may be admitted  
184 as a CRT; however, prior to graduation they must achieve the RRT credential.

185  
186  
187 **PROGRAM REVIEW**

188  
189 Accreditation of degree advancement programs is a voluntary process that requires a  
190 comprehensive review of the program relative to these Standards. While the process is voluntary,  
191 it provides programs with external validation of their educational offering. Additionally,  
192 accreditation offers prospective degree advancement students a means by which they can judge  
193 the quality of the educational experience offered by the program.

194  
195 Decisions regarding initial accreditation are based on the CoARC’s assessment of the  
196 information in the accreditation application and self-study report and the report of a site visit  
197 evaluation team. Ongoing accreditation decisions are based on the CoARC’s review of the  
198 program’s annual Report of Current Status and any reports or documents submitted to the  
199 CoARC by the program during each accreditation cycle. To clarify submitted information  
200 additional data may be requested at any time during the review process.

201  
202  
203 **FORMAT OF STANDARDS**

204  
205 The Standards are divided into six sections: **(1) Program Administration and Sponsorship;**  
206 **(2) Institutional and Personnel Resources; (3) Program Goals, Outcomes, and Assessment; (4)**  
207 **Curriculum; and (5) Fair Practices and Recordkeeping.** Within each section, specific Standards  
208 delineate the CoARC’s requirements for accreditation.

209  
210 Following each Standard, there are items of evidence the program must supply to  
211 demonstrate compliance with the Standard. The evidence list is included to facilitate program  
212 responses to requests for progress reports and to accreditation actions by the CoARC, to help  
213 programs develop self- study reports and prepare for on-site visits, and to support review of the  
214 program by the on-site team and the Commission. These items are the minimum information

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

215 necessary to determine compliance and each item must be addressed. Additional information  
216 that the program believes supports compliance may also be provided.  
217

218 Where appropriate, the CoARC has added *Interpretive Guidelines* that explain the  
219 rationale, meaning and significance of a Standard both for those responsible for educational  
220 programs and for those who evaluate these programs for the CoARC. These statements are not  
221 exclusive or exhaustive; they are meant to clarify the operational meaning of the Standard to  
222 which they refer. Expanded guidance, in the form of examples to help programs understand and  
223 interpret the “must” statements within the Standards, is included. The CoARC will periodically  
224 review and revise the *Interpretive Guidelines*, based on questions and comments it receives  
225 regarding their clarity and usefulness as well as to better reflect evolving educational and clinical  
226 practices.  
227

228 The program must demonstrate its compliance with all components of each Standard. If  
229 the program is not in compliance with one component of a Standard, the entire Standard will be  
230 cited. In some cases, the CoARC is very prescriptive about what it needs to review to assess  
231 compliance. This might include such things as specific materials listed in the application,  
232 appendices or required materials for review during a site visit, with the role of site visitors being  
233 to verify, validate, and clarify this information. However, the CoARC is not directive regarding  
234 many process issues, thereby allowing programs and institutions to develop those that best suit  
235 their programs. Examples of process issues include: the program’s expected student learning  
236 outcomes (ESLO); the number of credits or hours assigned; curriculum and course formats (i.e.,  
237 traditional vs. problem-based); and curriculum delivery methods. It is the program’s  
238 responsibility to address these as specified in the Standards; the CoARC reserves the right to  
239 request clarification of process issues that may impact accreditation.  
240

241  
242

**SECTION 1 – PROGRAM ADMINISTRATION AND SPONSORSHIP**

**Institutional Accreditation**

DA1.1 An educational sponsor must be a post-secondary academic institution accredited by an institutional accrediting agency recognized by the U.S. Department of Education (USDE) and must be authorized under applicable law or other acceptable authority to award graduates of the program a baccalaureate or higher degree at the completion of the program.

Evidence of Compliance:

- Documentation of current accreditation status;
- Documentation of authorization by a state agency to provide a post-secondary education program (if applicable).

**Interpretive Guideline:**

*A copy of the educational sponsor’s most current institutional accreditation certificate or letter denoting its accreditation status must be submitted with the self-study or Letter of Intent Application. There are additional questions relating to the sponsor’s accreditation status and authority under applicable state laws to provide postsecondary education in the Application for Accreditation Services. The sponsor is responsible for notifying the CoARC of any adverse change in its institutional accreditation status as per CoARC Policy 1.07.*

**Consortium**

DA1.2 When more than one institution (a consortium) is sponsoring a program, at least one of the members of the consortium must meet the requirements in Standard DA1.1. The consortium must be capable of providing all resources necessary for the program. The responsibilities of each member must be clearly documented in a formal affiliation agreement or memorandum of understanding which delineates responsibility for all aspects of the program including instruction, supervision of students, resources, reporting, governance and lines of authority. In the setting of Degree Advancement a consortium may apply in situations where an associate program that has a dual enrollment agreement with a University that may confer the baccalaureate component.

Evidence of Compliance:

- Duly executed consortium agreement, contract or memorandum of understanding;
- One or more organizational charts indicating the program’s relationship to the components of the consortium and clearly depicting how the program reports to or is supervised by the various components of the consortium.

**Interpretive Guideline:**

*This Standard is applicable only to programs sponsored by a consortium (see definitions section of the Standards). A copy of a written agreement detailing the relationship between the*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

288 *institutions involved in the consortium and documenting the responsibilities of each member must*  
289 *be provided. This evidence can be in the form of an affiliation agreement, a Memorandum of*  
290 *Understanding or a Business Agreement. Organizational chart templates and a sample*  
291 *consortium agreement can be found on the CoARC website ([www.coarc.com](http://www.coarc.com)). Additional*  
292 *information used to determine compliance with this Standard is provided with the Application for*  
293 *Accreditation Services.*

294  
295

**Sponsor Responsibilities**

296

297  
298 DA1.3 The sponsor must either be capable of providing the required general education courses  
299 or have a process for accepting transfer credit from other institutionally accredited  
300 institutions for these courses. The sponsor must be capable of providing all of the didactic  
301 and laboratory instruction, (and any necessary clinical experience) requisite to the  
302 completion of programmatic and degree requirements.

303

Evidence of Compliance:

- 304 ● Institutional academic catalog listing programs of study and course offerings;
- 305 ● Sponsor policies for credit transfer, if applicable.

306

**Interpretive Guideline:**

307  
308 *The program sponsor must provide financial and other support for all laboratory and*  
309 *clinical instruction, as required. A list of all courses in the curriculum (and which member of the*  
310 *consortium is responsible for each course, if applicable) must be provided.*

311

312

313  
314 DA1.4 The sponsor is responsible for:

- 315 a) Curriculum planning, course selection and coordination of instruction by program
- 316 faculty;
- 317 b) Continued professional growth of faculty.

318

Evidence of Compliance:

- 319 ● Institutional policies and procedures related to curriculum planning, course selection
- 320 and coordination of instruction by program faculty;
- 321 ● Minutes of meetings of Program Faculty for curriculum planning, course selection and
- 322 instruction coordination;
- 323 ● Institutional policies demonstrating support for continued professional growth of
- 324 faculty;
- 325 ● Documentation of continuing professional development activities of the faculty and
- 326 institutional support of these activities.

327

**Interpretive Guideline:**

328  
329 *Professional development defines faculty efforts to remain current with clinical and*  
330 *academic skills and to develop new skills as needed for position responsibilities. The types of*  
331 *professional development opportunities for faculty members vary, as does institutional support.*  
332

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

333  
334  
335  
336  
337  
338  
339  
340

347  
348  
349  
350  
351  
352  
353  
354  
355  
356  
357  
358  
359  
360  
361  
362  
363  
364  
365  
366  
367  
368  
369  
370  
371  
372  
373  
374  
375  
376  
377

*Types of institutional support may include, but are not limited to:*

- *Funding for maintaining National Board for Respiratory Care (NBRC) credential status;*
- *Funding for attendance at professional organization meetings and/or continuing education conferences;*
- *Providing non-vacation time for professional organizational activities, clinical practice, research/scholarly activities, and review and study related to credential maintenance;*
- *Encouraging faculty to pursue an advanced degree by offering tuition remission or time off;*
- *Programs that are primarily online should minimally provide the following:*
  - \* *Introductory and continuing faculty development courses for online education;*
  - \* *Learning management system for online courses;*
  - \* *Remote library resources;*
  - \* *Web conferencing capability.*

*Evidence for institutional support can include program policies, institutional policies, and listing of the continued professional development activities of the faculty along with documentation of institutional support of these activities.*

DA1.5 Program academic policies must apply to all students and faculty regardless of location of instruction.

- Evidence of Compliance:
- Student handbook separate and specific to the degree advancement program;
  - Published program policies.

**Interpretive Guideline:**

*Program policies must be consistent for all venues of instruction (didactic, laboratory, and clinical). Programs with more than one main program site and programs using distance education must have academic policies that are consistent for all instructional locations. For programs with clinical education, clinical affiliation agreements or MOUs may specify that certain program policies will be superseded by those of the clinical site. Programs that accept CRT credentialed applicants must make students aware that successful completion of the RRT credential is a graduation requirement.*

**Substantive Changes**

DA1.6 The sponsor must report substantive change(s) (see Section 9 of the CoARC Accreditation Policies and Procedures Manual) to the CoARC within the time limits prescribed. Substantive change(s) include:

- a) Change of Ownership/Sponsorship/Legal status or Change in Control
- b) Change in the degree awarded
- c) Addition of an Entry into the Respiratory Care Professional Practice degree track
- d) Initiation of (an) Additional Degree Track Program(s)

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 378 e) Change in program goal(s)
- 379 f) Change in the curriculum or delivery method
- 380 g) Addition of the Sleep Specialist Program Option
- 381 h) Request for Inactive Accreditation Status
- 382 i) Voluntary Withdrawal of Accreditation
- 383 k) Requests for increases in Maximum Enrollment
- 384 l) Change in Program Location
- 385 m) Vacancy in Key Personnel positions
- 386 n) Change in Key Personnel
- 387 o) Change in institutional accreditor of the educational sponsor
- 388 p) Change in accreditation status of the educational sponsor
- 389 q) Change in accreditation status of any member of the consortium (where applicable)
- 390 r) Transition of a Program Option to a Base Program

391  
392 Evidence of Compliance:

- 393 ● Timely submission and subsequent approval of the CoARC Application for Substantive  
394 Change or related documentation required by CoARC Policies.

395  
396 **Interpretive Guideline:**

397 *The process for reporting substantive changes is defined in Section 9 of the CoARC*  
398 *Accreditation policies and Procedures Manual (available at [www.coarc.com](http://www.coarc.com)). If a program is*  
399 *unclear as to whether a change is substantive in nature, it should contact the CoARC Executive*  
400 *Office. In general, a program considering or planning a substantive change should notify CoARC*  
401 *early in the process. This will provide an opportunity for the program to consult CoARC Executive*  
402 *Office staff regarding the procedures to be followed and the potential effect of the change on its*  
403 *accreditation status.*

404  
405 *If during any type of programmatic review substantive changes that have already been*  
406 *implemented without notification of CoARC are discovered, the CoARC Executive Office should be*  
407 *contacted as soon as possible.*

**SECTION 2 – INSTITUTIONAL AND PERSONNEL RESOURCES**

**Institutional Resources**

DA2.1 The sponsor must ensure that fiscal, academic and physical resources are sufficient for the program to achieve its goals and objectives, as defined in Standard DA3.1, at all program locations, regardless of the instructional methodology used.

Evidence of Compliance:

- Results of annual program resource assessment as documented in the CoARC Resource Assessment Matrix (RAM).

**Interpretive Guideline:**

*The sponsor must have the financial and physical resources required to develop and sustain the program. Annual budget appropriations should demonstrate that the program is able to employ and retain sufficient, qualified, competent faculty and to purchase and maintain all the academic resources necessary for the program to meet its goals. Annual appropriations should be sufficient to allow for the innovations and changes, including technological advances, necessary for the program to stay current as education in the profession evolves. The budget should be such that resources are assured for current students to complete the program, even in the event of program closure.*

*Academic resources include, but are not limited to: audio/visual equipment; instructional materials; laboratory equipment and supplies; and technological resources that provide access to medical information and current books, journals, periodicals and other reference materials related to the curriculum. The convenience of student access to educational materials should be evident, as demonstrated by the physical proximity or online availability of library facilities.*

**Key Program Personnel**

DA2.2 The sponsor must appoint, at a minimum, a full-time Program Director.

Evidence of Compliance:

- Documentation of Employment;
- Written job descriptions including minimal qualifications.

**Interpretive Guideline:**

*The length of the Program Director's full-time appointment (e.g., 10-month, 12-month, etc.) must be sufficient to allow him/her to fulfill the responsibilities as identified in DA2.3. Documentation of employment must include Letters of Appointment and Acceptance (templates are available on the CoARC website). The PD must have academic appointments and privileges comparable to other faculty with similar academic responsibilities in the institution. The names of the PD (and other key personnel, if applicable) and the program faculty should be published (at a minimum on the program's website).*

492  
493  
494  
495  
496  
497  
498

**Program Director**

DA2.3 The Program Director (PD) must be responsible for all aspects of the program, both administrative and educational. Administrative aspects include fiscal planning, curricular planning and development, continuous review and analysis of outcomes, and the overall effectiveness of the program based on student learning outcomes relative to program expectations. There must be evidence that sufficient time is devoted to the program by the PD so that his or her educational and administrative responsibilities can be met.

Evidence of Compliance:

- CoARC Teaching and Administrative Workload Form;
- Institutional job description.

**Interpretive Guideline:**

*PDs often hold other leadership roles within the institution (e.g., PD of Entry Level Program, Dean, Department or Division Chair) or spend non-program time in clinical practice or research. The PD workload should balance these responsibilities with those of program teaching and administration. Documentation of sufficient release time to meet the administrative responsibilities of the program should be provided as additional evidence of compliance with this Standard.*

DA2.4 The PD must have earned at least a master’s degree from an academic institution accredited by an institutional accrediting agency recognized by the U.S. Department of Education (USDE).

Evidence of Compliance:

- Academic transcript denoting the highest degree earned.

**Interpretive Guideline:**

*Degrees are acceptable if they were awarded by an institution that is accredited by a USDE-recognized institutional accrediting body. The degree earned can be in any field of study. Degrees from non-accredited institutions do not meet this Standard and individuals with such degrees cannot be Program Directors.*

*For degrees from institutions in countries other than the United States, the CoARC will use an external review process by a foreign educational credentials evaluation service (e.g., [www.naces.org](http://www.naces.org)) to determine whether the foreign transcript is equivalent to that of the required minimum degree.*

DA2.5 The PD must be associated with an accredited respiratory care program, graduate school, or medical school and must have a:

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 499 a) valid RRT credential OR be a physician (MD or DO);  
500 b) current professional license or certificate unless exempted from licensure under state  
501 or federal law;  
502 c) minimum of four (4) years' experience as an RRT OR physician (MD or DO) with at  
503 least two (2) years must include experience in clinical respiratory care, pulmonary  
504 medicine, cardiothoracic surgery, critical care, anesthesiology, healthcare  
505 administration, healthcare research, or a subject area directly related to the degree  
506 conferred;  
507 d) minimum of two (2) years' teaching experience in clinical respiratory care, research,  
508 management, education, or a subject area directly related to the degree conferred by  
509 the program.  
510

511 Evidence of Compliance:

- 512 ● Documentation of a current state license;  
513 ● Credential verification by the NBRC, ABMS, AOA, or relevant credentialing agency;  
514 ● Curriculum vitae;  
515 ● College transcripts.  
516

517 **Interpretive Guideline:**

518 *Documentation of credential validation can include a copy of the NBRC, American Board*  
519 *of Medical Specialties (ABMS), or American Osteopathic Association (AOA) certificate or an NBRC,*  
520 *ABMS, or AOA Credentials Verification Letter. Expired credentials are not valid. The CoARC*  
521 *Curriculum Vitae Outline for Program Faculty (available on the CoARC website) can be used as a*  
522 *curriculum vitae.*  
523

524 *If a program is offered by distance education the PD may have a license for any of the*  
525 *states served. In a state or jurisdiction where licensing is not available, a credential comparable*  
526 *to licensing should be used.*  
527

528 *Regardless of accreditation status, all programs accepting applications to fill vacancies in*  
529 *Key Personnel positions are required to comply with this Standard.*  
530

531  
532 DA2.6 The PD must have regular and consistent contact with students and program faculty  
533 regardless of program location.  
534

535 Evidence of Compliance:

- 536 ● Results of student course evaluations;  
537 ● Results of the CoARC DA Student and Personnel Program Resource Surveys.  
538

539 **Interpretive Guideline:**

540 *Student course evaluations and interview responses should affirm that the PD is accessible*  
541 *to students throughout their course of study and that the extent of interaction between the PD*  
542 *and students facilitates the achievement of program goals. The PD must be available and*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

543 *accessible (e.g., in-person, phone, or on-line) when students are actively taking professional*  
544 *coursework.*

545

546

547 **Instructional Faculty**

548

549 DA2.7 In addition to the Program Director, there must be sufficient personnel resources to  
550 provide effective instruction for each course of study.

551

552 Evidence of Compliance:

- 553 ● Results of annual program resource assessment as documented in the CoARC DA RAM;
- 554 ● Student surveys of faculty performance (e.g., course evaluation);
- 555 ● Course class lists and faculty teaching schedules.

556

557 **Interpretive Guideline:**

558 *The program should be able to confirm that instructional faculty are qualified in the*  
559 *content areas that they are teaching. Qualified means that faculty have demonstrated a*  
560 *sufficient level of knowledge, skills and competency in those content areas. ‘Appropriately*  
561 *credentialed’ depends on the topics/skills being taught. Instructional faculty need not be*  
562 *respiratory therapists, and can include professionals with advanced degrees or with experience*  
563 *and training in the requisite field or discipline (e.g., MBAs, physicians, PhDs, pharmacists, nurses,*  
564 *pulmonary function technologists, etc.). Accordingly, this Standard would apply to volunteer*  
565 *faculty, adjuncts, part-time faculty, or full-time faculty.*

566

567

568 **Administrative Support Staff**

569

570 DA2.8 There must be sufficient administrative and clerical support staff to enable the program  
571 to meet its goals and objectives as defined in Section 3.

572

573 Evidence of Compliance:

- 574 ● Results of annual program resource assessment as documented in the CoARC DA RAM.

575

576 **Interpretive Guideline:**

577 *Administrative/clerical support may include “pool” staff who support other programs. This*  
578 *model is used at many institutions. Administrative and clerical support should be sufficient to*  
579 *meet the needs of the program, meaning that the level of support allows the PD to achieve both*  
580 *educational and administrative responsibilities. Faculty should have access to instructional*  
581 *specialists, such as those in the areas of curriculum development, testing, counseling, computer*  
582 *usage, instructional resources and educational psychology, as needed. Secretarial and clerical*  
583 *staff should be available to assist the Program Director and other program faculty in preparing*  
584 *course materials, correspondence, maintaining student records, achieving and maintaining*  
585 *program accreditation, and providing support services for student recruitment and admissions*  
586 *activities.*

587

**Assessment of Program Resources**

DA2.9 The program must, at least annually, use the CoARC Resource Assessment Surveys to assess the resources described in Standard DA2.1. The survey data must be documented using the CoARC DA Resource Assessment Matrix (RAM). The results of resource assessment must be the basis for ongoing planning and appropriate changes in program resources; any deficiency identified requires development of an action plan, documentation of its implementation, and evaluation of its effectiveness as measured by ongoing resource assessment.

Evidence of Compliance:

- Results of annual program resource assessment as documented in the CoARC RAM, over sufficient years to document the development and implementation of appropriate action plans and subsequent evaluations of their effectiveness.

**Interpretive Guideline:**

*Resource Assessments must be performed annually using, at a minimum, the CoARC’s DA Student and Program Personnel Resource Assessment surveys (SPRS and PPRS) (www.coarc.com). Resource Assessments must be reported separately for each portion of the program with a separate CoARC ID number. Only the approved CoARC DA RAM format can be used for reporting purposes (available at www.coarc.com). The RAM format documents the following for each resource assessed: a) Purpose statements; b) Measurement systems; c) Dates of measurement; d) Results; e) Analysis of results; f) Action plans and implementation, and g) Reassessment.*

*Both surveys should be administered as close to the end of the academic year as possible. The SPRS must be administered annually to all currently enrolled students. The PPRS should be completed by program faculty, the Medical Advisor, and Advisory Committee Members near the end of the academic year, preferably at a meeting of the Advisory Committee with members of each group answering the questions pertaining to that group. For both surveys, at least 80% of survey responses must be 3 or higher for each resource area. Any resource for which this cut score is not achieved is deemed to be suboptimal and an action plan must be developed to address identified deficiencies. The results of the most recent surveys, in RAM format, should be sent to the CoARC with the Annual Report of Current Status. Programs must maintain resource assessment documentation for five years (RAM, SPRS, and PPRS).*

**SECTION 3 – PROGRAM GOALS, OUTCOMES, AND ASSESSMENT**

**Statement of Program Goals**

DA3.1 The program must have the following goal defining minimum expectations: *“To provide graduates of entry into respiratory care professional practice degree programs with additional knowledge, skills, and attributes in leadership, management, education, research, and/or advanced clinical practice that will enable them to meet their current professional goals and prepare them for practice as advanced degree respiratory therapists.”*

Evidence of Compliance:

- Published program goal(s) in student handbook and program or institutional website.

**Interpretive Guideline:**

*The CoARC requires that all degree advancement programs have the same goal defining minimum expectations. Programs must have program expected student learning outcomes of the program’s choosing, but these have measurable outcomes, and there must be a systematic process to assess achievement of these outcomes. All program goals must be made known to all prospective and currently enrolled students. Program outcome data, faculty and advisory committee meeting minutes, program and sponsor publications, and information made available during on-site interviews should demonstrate compliance with this Standard. It is suggested, but not required, that a program have a culminating experience that demonstrates student mastery of the programmatic student learning outcomes.*

DA.3.2 Program goal(s) must form the basis for ongoing program planning, implementation, evaluation, and revision. Program goal(s) and expected student learning outcomes must be reviewed annually by program personnel to ensure compatibility with the mission of the sponsor.

Evidence of Compliance:

- Documentation of annual review and analysis of goals and outcomes by program personnel, as evidenced in the minutes of faculty meetings and the Annual Report of Current Status (RCS);
- Documentation that the program’s expected student learning outcomes (ESLOs) are compatible with the sponsor’s mission and program goal.

**Interpretive Guideline:**

*Broad-based, systematic and continuous planning and evaluation designed to promote achievement of program goal(s) is necessary to maximize the academic success of enrolled students in an accountable and cost effective manner. The program should explain, in narrative format, how its ESLOs are compatible with, and help(s) to fulfill or advance, the mission of the sponsor and goals of the program.*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

707  
708  
709  
710  
711  
712  
713

**Advisory Committee**

DA3.3 The communities of interest served by the program must include, but are not limited to: students, graduates, faculty, college administration, employers, physicians, and the public. An advisory committee (AC), with representation from each of the above communities of interest (and others as determined by the program) must meet with key personnel at least annually to assist program and sponsor personnel in reviewing and evaluating program outcomes, instructional effectiveness and program response to change, and to assess the need for the addition of/changes to optional program goals.

Evidence of Compliance:

- Current AC membership list identifying the community of interest with which each member is affiliated;
- Minutes and attendance list of AC meetings.

**Interpretive Guideline:**

*The purpose of an advisory committee (AC) is to provide representatives of the program’s communities of interest opportunity for discussion and interaction aimed at improving the program, evaluating program goals, recruiting qualified students and meeting employment needs of the community. The responsibilities of the AC should be defined in writing. Program key personnel should participate in the meetings as non-voting members.*

*For programs in which the communities of interest are different for the DA programs as compared to the entry level programs, they should consider a separate advisory committee that reflects the communities of interest of that program. A Chair of the Advisory Committee must be elected by its members. Employees of the degree-granting sponsor and program key personnel are prohibited from serving as Chair. The Advisory Committee must include a member of the public who should be an informed person with a broad, community-based point of view and who can contribute an outsider’s perspective. The public member cannot be someone who is a current or past member of any health care profession including Respiratory Care or an individual who has/had any relationship whatsoever with the program or its sponsor.*

*The AC should review program outcomes, instructional effectiveness, and planned program responses to these and should evaluate proposed changes to/addition of optional goal(s) and any other changes as warranted. Minutes of AC meetings should reflect an annual review of all resources - curriculum, capital equipment, clinical affiliates, etc. In addition, the AC should be asked to review and discuss proposed substantive changes as outlined in Section 9.0 of the CoARC Accreditation Policies and Procedures Manual. Policies and procedures outlining AC responsibilities, appointments, terms and meeting procedures as well as AC meeting minutes and an ongoing record of its deliberations and activities would demonstrate compliance with this Standard.*

**Student Learning Outcomes**

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

714  
715 DA3.4 The program must define and make available to enrolled students and faculty the  
716 program expected student learning outcomes (ESLOs) that align with DA Standards 3.1  
717 and 4.3 – 4.9 and address the professional competency expectations determined by the  
718 program, as outlined in Section 4. These ESLOs must clearly articulate what students are  
719 expected to be able to: do, achieve, demonstrate, or know upon completion of the  
720 program. The program must determine how to measure achievement of each of the  
721 ESLOs and must ensure that students understand the measurement systems and  
722 how/when they will be used.

723  
724 Evidence of Compliance:

- 725 ● Documentation of expected ESLOs for each segment of professional coursework that
- 726 specifies the evidence (direct and indirect) to be used to assess each ESLO;
- 727 ● Documentation that ESLOs are provided to all enrolled students and faculty;
- 728 ● Programs must provide an ESLO plan that includes objective and subjective measures of
- 729 outcomes, where in the course of study the ESLOs are introduced and developed, and
- 730 where mastery of the competency is demonstrated The ESLO plan should be
- 731 documented in curriculum map and narrative.

732  
733 **Interpretive Guideline:**

734 *The program’s expected student learning outcomes should reflect the competencies the*  
735 *program faculty expect of a graduate of the program. To that end they are program wide with*  
736 *aspects of the competency introduced early in the curriculum, developed in additional courses,*  
737 *and mastery demonstrated later in the coursework. CoARC does not prescribe ESLOs for a given*  
738 *program, it is the responsibility of the program faculty, with input from the advisory committee,*  
739 *to define the ESLOs of the program and to determine, based on her/his professional goals, which*  
740 *of the ESLOs are applicable to each student. Standards 4.3 – 4.9 can serve as guidance for the*  
741 *content of the ESLOs and are assessed in the graduate surveys. ESLOs must be defined at a level*  
742 *above those of the respiratory therapist entering the profession. ESLOs for each competency*  
743 *should be documented in the course syllabi/manual and must be consistent with the roles and*  
744 *degree requirements for which the program is preparing its graduates. Assessment of student*  
745 *learning outcomes should involve both direct and indirect examination of student performance.*

746  
747 *Types of direct evidence that might be used to evaluate expected competencies include (but*  
748 *are not limited to):*

- 749 ● *Faculty-designed comprehensive or capstone examinations and assignments;*
- 750 ● *Performance on licensing or other external examinations;*
- 751 ● *Demonstrations of abilities in context, including simulations where applicable;*
- 752 ● *Portfolios of student work compiled over time;*
- 753 ● *Case-based examinations or care plans for disease management;*
- 754 ● *Published or unpublished research/scholarship;*
- 755 ● *Literature searches involving critical reviews of peer-reviewed publications;*
- 756 ● *Samples of student work generated for course assignments;*
- 757 ● *Scores on programmatic tests accompanied by test “blueprints” describing what the tests*  
758 *assess;*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 759 • *Recorded observations of student behavior in learning situations (e.g., presentations, group*  
760 *discussions);*  
761 • *Student self-reflection regarding values, attitudes and beliefs.*

762  
763 *Types of indirect evidence that might be used to evaluate expected competencies include*  
764 *(but are not limited to):*

- 765 • *Given the focus on student performance or achievement relative to the other members of the*  
766 *class, course grades provide information about student learning that can vary from class to*  
767 *class, and accordingly may be used inconsistently;*  
768 • *Comparison between admission and graduation rates;*  
769 • *Number or rate of graduating students pursuing their education at the next level;*  
770 • *Employment or placement rates of graduating students into appropriate career positions;*  
771 • *Course evaluation items related to overall course or curriculum quality rather than instructor*  
772 *effectiveness;*  
773 • *Number or rate of students involved in research, collaborative publications, presentations,*  
774 *and/or service learning;*  
775 • *Surveys, questionnaires and focus-group/individual interviews, dealing with faculty and staff*  
776 *members' perception of both student learning as supported by the program and*  
777 *program/sponsor services provided to students;*  
778 • *Quantitative data such as enrollment numbers;*  
779 • *Surveys, questionnaires and focus group/individual interviews dealing with students'*  
780 *perception of their own learning;*  
781 • *Surveys, questionnaires and focus group/individual interviews dealing with alumni's*  
782 *perception of their own learning outcomes or of their current career satisfaction;*  
783 • *Surveys, questionnaires and focus group/individual interviews dealing with faculty and staff*  
784 *perceptions of student learning;*  
785 • *Honors, awards, scholarships, and other forms of public recognition earned by students and*  
786 *alumni.*

787  
788

**Assessment of Program Goals**

789  
790  
791 DA3.5 The program must formulate a systematic assessment process to evaluate the ESLOs  
792 defined in DA3.4. Rubrics must be established for each of the ESLOs and made known to  
793 the students prior to their evaluations. Based on the results of the assessment process,  
794 the program must make adjustments to the curriculum as needed, but no less than  
795 annually.

796  
797 Evidence of Compliance:

- 798 • Rubrics for the expectations of the student for each mastery assignment;  
799 • Rubrics for all ESLOs included in all course syllabi and in the student handbook;  
800 • Annual Report of Current Status (RCS) documenting ESLOs;  
801 • Minutes of faculty and advisory committee meetings.

802  
803 **Interpretive Guideline:**

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

*The program must establish a method for ensuring that each student will achieve all applicable competencies prior to completion of the program. For example, a declaration of intent to complete all applicable competencies could be developed for students to sign prior to beginning the program. Although the program must demonstrate that it is providing distinct learning experiences for each competency, the emphasis (i.e. the breadth and depth of the experiences) will vary with focus area, the degree awarded, and the professional goal of the individual.*

*A well designed program assessment process should reflect adequate collection and interpretation of data regarding student learning, program outcomes, and the effectiveness of administrative functions. The process should include an assessment of both the quality of the data collected and its critical analysis by the program. The process should provide evidence that the program is thorough and precise with regards to data collection and its management and interpretation of the data, and that determination of the potential/necessity for improvement or change is based on the relevance of the collected data to the various aspects of the program.*

DA3.6 Program outcomes must be assessed annually, using the standardized CoARC DA Graduate Surveys.

Evidence of Compliance:

- Hard copy or electronic records of completed CoARC DA Graduate Surveys;
- Results of annual Report of Current Status accepted by CoARC.

**Interpretive Guideline:**

*CoARC requires the use of its Graduate Surveys for Degree Advancement Programs (available at [www.coarc.com](http://www.coarc.com)) as part of each program's ongoing self-assessment. The program must provide an analysis and action plan to address each deficiency identified in these surveys. The program should also carefully review all pertinent data, such as student evaluations of each course and rotation, student evaluations of faculty and faculty evaluations of students' preparedness for rotations along with failure rates for each course and clinical rotation, student attrition and records of student remediation, analyze these data and prepare focused action plans to address identified deficiencies.*

**Student Evaluation**

DA3.7 The program must have clearly documented assessment measures by which all students are regularly evaluated for their acquisition of the knowledge, skills, attitudes, and competencies required for graduation. The program must conduct these evaluations equitably and with sufficient frequency to facilitate prompt identification of learning deficiencies and the development of a means for their remediation within a suitable time frame. For programs providing distance education with on-line exams or quizzes as part of the evaluation process, the program must provide evidence that such testing is secure, preserves academic integrity and maintains quality and fairness.

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

849 Evidence of Compliance:

- 850 ● Student handbook, course syllabi or other documents readily available to students that
- 851 explain the number and frequency of student evaluations as well as remediation
- 852 policies;
- 853 ● Student evaluations of instruction documenting satisfaction with the frequency and
- 854 objectivity of evaluations and with the opportunities for remediation;
- 855 ● Student evaluations performed by faculty, supporting the equitable administration of
- 856 the evaluations;
- 857 ● Records of student academic counseling;
- 858 ● A description of the means used to assure academic integrity such as proctored exams,
- 859 locked browser systems, video monitoring, etc.;
- 860 ● A policy for assuring academic integrity and clear academic policies for faculty/students
- 861 if violations are identified;
- 862 ● Faculty meeting minutes that include review of such processes and revisions [if
- 863 applicable].
- 864

**Interpretive Guideline:**

866 *Evaluation of student performance is necessary to ensure that individual student learning is*

867 *consistent with expected outcomes. Grading criteria must be clearly defined for each course,*

868 *communicated to students, and applied consistently. The processes by which evaluations of*

869 *individual student performance are to be communicated to students must be clearly understood*

870 *by all concerned. Written criteria for passing, failing, and progress in the program must be given*

871 *to each student upon his/her entry into the program. For both didactic and applied components*

872 *the evaluation systems used to assess student progress must be related to the objectives and*

873 *competencies described in the curriculum. Evaluations must occur with sufficient frequency to*

874 *provide both students and faculty with timely indications of the students' progress and academic*

875 *standing and to serve as reliable indicators of the appropriateness of course design and the*

876 *effectiveness of instruction. Thorough assessment requires both formative and summative*

877 *evaluations and involves frequent assessments by a number of individuals based on the program's*

878 *pre-specified criteria. Using this criteria, both students and faculty should be able to assess*

879 *student progress in relation to the stated goals and objectives of the program. If a student does*

880 *not meet the pre-specified evaluation criteria, provision should be made for remediation or,*

881 *following repeated shortcomings, for dismissal.*

883 *Overall evaluation of student performance is the responsibility of program faculty. When*

884 *applicable, faculty should seek input from clinical preceptors who facilitate student learning*

885 *during clinicals and may perform formative evaluations. However, faculty are ultimately*

886 *responsible for the summative evaluation of individual student learning outcomes and for*

887 *subsequent remediation as needed.*

889 *When a program uses an examination with a particular cut score which may override prior*

890 *academic performance, the program has created a "consequential examination result." Under*

891 *these circumstances the program must justify such use of both the examination and the cut score.*

892 *For examinations which are simply part of overall academic performance evaluation, such*

893 *documentation is unnecessary.*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

894  
895 *For programs providing distance education with on-line exams or quizzes as part of the*  
896 *evaluation process, they should provide proctoring for online exams or quizzes that ensure*  
897 *academic integrity.*  
898

899  
900 **Reporting Program Outcomes**

901  
902 DA3.8 The program must, at a minimum, meet the outcome thresholds established by CoARC  
903 regardless of student location and instructional methodology.  
904

905 Evidence of Compliance:

- 906 ● Results of annual Report of Current Status that meet CoARC thresholds.
- 907  
908

909 **Interpretive Guideline:**

910 *Programmatic summative outcome measures should include graduate achievement on*  
911 *national credentialing specialty examinations (when applicable), and/or program-defined*  
912 *summative outcome measures related to ESLOs (e.g., Capstone project). For students*  
913 *undertaking specialty education in respiratory care (i.e. neonatal, intensive care, sleep disorders,*  
914 *etc.) the program may use results on national credentialing specialty examinations as an outcome*  
915 *measure and these data must be reported annually. However, there will be no CoARC defined*  
916 *outcomes assessment threshold for these examinations.*  
917

918 *CoARC has established minimum performance criteria (Thresholds of Success) for each of its*  
919 *established outcomes (see [www.coarc.com](http://www.coarc.com)). Applicable program outcomes must meet these*  
920 *assessment thresholds each year, as documented in the Annual Report of Current Status (RCS).*  
921 *When submitting their RCS, programs must include analysis and action plans to address any*  
922 *subthreshold outcomes.*  
923

924 *Retention is defined as the number of students formally enrolled in a respiratory care*  
925 *program during a three-year reporting period who graduated from the program after completing*  
926 *all programmatic and graduation requirements.*  
927

928 *Graduate satisfaction surveys must be administered twelve (12) months after graduation.*  
929

930 *Professional advancement: an outcome measure requiring that graduates meet program-*  
931 *defined outcomes criteria related to priorities in the program curriculum, such as management,*  
932 *advanced clinical practice/patient care, teaching, research, professional service, and/or other*  
933 *professional development metrics.*  
934

935  
936 DA3.9 The program must use the standardized CoARC electronic reporting tool to submit an  
937 annual Report of Current Status to CoARC.  
938

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

939 Evidence of Compliance:

- 940     • Annual Report of Current Status accepted by the CoARC Executive Office.

941

942 **Interpretive Guideline:**

943     *All programs must complete and submit an Annual Report of Current Status (RCS) by the*  
944 *July 1 deadline each year. The RCS documents the program's outcomes results (as defined in*  
945 *DA3.9) in relation to the thresholds, where applicable. If applicable, the program/option must*  
946 *also list its current clinical affiliates in the RCS. The Annual Report of Current Status template is*  
947 *available at [www.coarc.com](http://www.coarc.com).*

948

949

950 DA3.10 Programs not meeting all established CoARC outcomes assessment thresholds must  
951     develop a plan of action for program improvement that includes addressing each of the  
952     identified shortcomings.

953

954 Evidence of Compliance:

- 955     • Progress report(s) with supporting documents.

956

957 **Interpretive Guideline:**

958     *Programs and program options with sub-threshold results, as described in Standard DA3.8,*  
959 *will be required to engage in an accreditation dialogue, which may include the submission of*  
960 *progress report(s), resource assessment, and/or detailed analyses and action plans addressing*  
961 *the sub-threshold results. A focused, on-site evaluation (site visit) may also be deemed necessary.*  
962 *The processes involved and deadlines for the submission of documents will be communicated to*  
963 *the program by the CoARC Executive Office. The process for remediation of outcomes deficiencies*  
964 *is explained in detail in Section 4.0 of the CoARC Accreditation Policies and Procedures Manual.*  
965 *A copy of the program's most recent progress report addressing the shortcoming(s) (including*  
966 *CoARC's program action letter requesting the report) must be included as minimum evidence.*

967

968     *If the program with subthreshold results does not currently have a Referee, one will be*  
969 *assigned. A Referee is a member of the CoARC Board assigned to serve as the liaison between the*  
970 *program and the CoARC. The Referee will provide consultation during the remediation process;*  
971 *analyze all documents for compliance with the Standards and Accreditation Policies and*  
972 *Procedures; help the program to identify ways to meet those Standards; communicate with the*  
973 *program concerning clarification of program matters; and recommend appropriate accreditation*  
974 *action to the CoARC Board.*

975

976

977

**SECTION 4 – CURRICULUM**

**Curriculum Consistent with Program Goals**

DA4.1 The curriculum must include the integrated content necessary for students to attain their ESLOs and for the program to achieve its stated goal(s).

Evidence of Compliance:

- Course syllabi for all courses: each syllabus must include course description and content outline, general and specific course objectives, methods of evaluation, and criteria for successful course completion;
- Published curriculum demonstrating appropriate course sequencing;
- College/program catalog with course descriptions for all required courses in the curriculum.
- Programs that include accepted credentialing exams as demonstration of mastery of an ESLO, should provide a detailed comparison of the program curriculum to the appropriate national credentialing agency specialty exam detailed content outline.

**Interpretive Guideline:**

*To ensure that students benefit from the program, the curriculum should build upon their prior education and professional experiences while remaining congruent with the goal(s) of the program and addressing the needs and expectations of the communities of interest. Course content must be consistent with the roles and degree requirements for which the program is preparing its graduates.*

*To accommodate student achievement of the skills and knowledge required for their chosen programmatic focus/career plans, the program must individualize the curriculum by developing specific learning opportunities for each student. These learning activities should be designed to provide the experiences that will advance the student from a competent entry-level practitioner to a proficient advanced practitioner.*

*The integration of content both horizontally and vertically within a curriculum involves proper course sequencing. Appropriate sequencing should build upon prior student learning and requires both consideration of all necessary content and its subsequent, appropriate integration. Within each subject area, course content should be sequential, connecting topic to topic, concept to concept and one year's work to the next. The progression of the curriculum should match the expected progression of required competencies.*

**Curriculum Review and Revision to Meet Goals**

DA4.2 Curricular content must be annually reviewed and revised to ensure both its consistency with the program's stated goal(s) and its effectiveness in achieving the expected competencies.

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1023 Evidence of Compliance:

- 1024 ● Course syllabi for all courses: each syllabus must include course descriptions and
- 1025 content outline, general and specific course objectives, methods of evaluation, and
- 1026 criteria for successful course completion;
- 1027 ● Documentation of the matching of the curriculum to the expected competencies/ESLOs;
- 1028 ● Documented analysis of program effectiveness in achieving the expected competencies
- 1029 and evidence that this is reported to the Advisory Committee (AC) annually, along with
- 1030 the AC response/recommendations.
- 1031 ● An action plan and follow-up must be implemented to address deficits noted in any
- 1032 content areas, and/or to address AC recommendations.

**Interpretive Guideline:**

*The program must provide evidence that curricular content is current and reflects the expected competencies for each subject/focus area. When credentialing examinations are used as (an) outcomes measure(s), the program must document comparison of the detailed content outlines for each applicable course with current credentialing exam content matrices, as available.*

**Continued Professional Practice Competencies**

Graduates must demonstrate proficiency with the set of knowledge, skills and attributes specific to the programmatic track or concentration, (e.g., clinical specialization, advanced practice, education, management, research, etc.) chosen by the student.

**DA4.3 Practice-Specific Knowledge and Skills**

The graduate must demonstrate proficiency in his/her course of study by completing a program-defined summative measure (e.g., Capstone project) or a national credentialing specialty examination, as applicable. Graduate competencies may include, but are not limited to:

- Demonstration of proficiencies specific to the track, concentration, or specialization;
- Ability to independently implement programmatic education and training to maintain proficiency in the chosen track, concentration, or specialization;
- Ability to apply skills acquired from the chosen track, concentration, or specialization to continued professional practice.

Evidence of Compliance:

- For each student/track, the syllabus of each required course must demonstrate that the curriculum addresses the required competencies, with related objectives, teaching modules and evaluations;
- List of competencies required for continued professional practice related to each student's/group's chosen domain;
- Documentation of student evaluations that demonstrate his/her achievement of all the competencies established by the program to meet this Standard;

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 1067
- 1068
- 1069
- 1070
- 1071
- 1072
- 1073
- Results on specialty credentialing exams (if applicable) and/or programmatic summative measures as reported in the Annual Reports of Current Status accepted by CoARC;
  - Independent study papers by students documenting their acquisition of advanced skills in their chosen track (i.e., education, research, management, quality improvement, protocol development, etc.).

1074 **DA4.4 Practice Related Knowledge**

1075 Graduates should acquire a greater breadth and depth of knowledge in the care of  
1076 patients with cardiopulmonary disease. This should provide them with the competencies  
1077 that would allow them to function better as respiratory care consultants. These  
1078 competencies should include, but are not limited to, demonstrating an in-depth  
1079 comprehension of:

- 1080
- Cardiopulmonary physiology;
  - Pathophysiology of common acute & chronic respiratory diseases;
  - Pathophysiology and management of common comorbidities of cardiopulmonary disease;
  - Cardiopulmonary diagnostics and monitoring;
  - The indications and contraindications for, and adverse effects of, advanced respiratory pharmacologic agents (e.g., inhaled nitric oxide, inhaled antibiotics, heliox, inhaled prostaglandins);
  - The pharmacology of medications used for common comorbidities of cardiopulmonary disease;
  - The indications and contraindications for, as well as adverse reactions to, advanced cardiopulmonary interventions (e.g., high frequency oscillation, airway pressure release ventilation, and extracorporeal membrane oxygenation);
  - Cellular biology and genetics relevant to cardiopulmonary disease;
  - Interventions effective for patient education and the prevention of common cardiopulmonary disease;
  - The use of evidence-based practice as a foundation for the delivery of care;
  - Ethical, moral and end-of-life issues

1098

1099 **Evidence of Compliance:**

- 1100
- Syllabi of required courses, with related objectives, teaching modules and evaluations demonstrating that the curriculum addresses these competencies;
  - Documentation of student evaluations that demonstrate achievement of these competencies;
  - CoARC Graduate Survey results that demonstrate satisfaction.
- 1101
- 1102
- 1103
- 1104
- 1105
- 1106

1107 **DA4.5 Professional Attributes**

1108 Professionalism is defined as the exhibition of skill, good judgment and polite behavior as  
1109 care is delivered. Foremost, it involves prioritizing the interests of those being served.  
1110 Professionalism requires that graduates understand their personal and professional  
1111 limitations and that they practice without impairment from substance abuse or mental

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 1112 illness. Graduates must demonstrate a high level of responsibility, ethical practice,  
1113 sensitivity to diversity, and adherence to legal and regulatory requirements. Professional  
1114 attributes may include, but are not limited to:
- 1115 • Respect, compassion, and integrity;
  - 1116 • Commitment to excellence and ongoing professional development;
  - 1117 • Accountability to patients, society, and the profession;
  - 1118 • Promoting a safe environment for patient care;
  - 1119 • The ability to recognize and correct systems-based factors that negatively impact  
1120 patient care;
  - 1121 • Professionalism in oral and written communication, including e-mails and on-line  
1122 discussion forums or blogs;
  - 1123 • Professional relationships with physicians, supervisors and other health care  
1124 providers;
  - 1125 • An understanding of legal and regulatory requirements, including the role of  
1126 respiratory therapists;
  - 1127 • A commitment to ethical principles, including those pertaining to the provision or  
1128 withholding of clinical care, the confidentiality of patient information, informed  
1129 consent, and business practices;
  - 1130 • A cost-effective approach to health care and resource allocation that does not  
1131 compromise quality of care;
  - 1132 • The ability to participate effectively in quality improvement activities with other  
1133 members of the health care delivery team;
  - 1134 • Sensitivity and appropriate responsiveness to issues related to patients' culture,  
1135 religion, age, gender, and disabilities;
  - 1136 • The ability to recognize and address gaps in medical knowledge and physical  
1137 limitations in themselves and others.

1138  
1139 Evidence of Compliance:

- 1140 • Syllabi of required courses (with related objectives, teaching modules and evaluations)  
1141 demonstrating that the curriculum addresses these competencies;
- 1142 • Student evaluations that demonstrate their achievement of the competencies listed in  
1143 this Standard;
- 1144 • Satisfactory CoARC Graduate Survey results.

1145  
1146  
1147 **DA4.6 Interpersonal and Inter-professional Communication**

1148 Based on his/her professional goals/programmatic track, graduates must demonstrate  
1149 interpersonal and communication skills that result in effective interaction with others  
1150 (e.g., patients, patients' families, physicians, other health professionals/ coworkers,  
1151 students, faculty, and the public). Opportunity to communicate proficiently and  
1152 appropriately, both orally and in writing must be incorporated into coursework. These  
1153 competencies may include, but are not limited to, the ability to:

- 1154 • Use the most effective communication techniques for the intended audience,  
1155 including innovative formats;

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 1156 • Maintain a climate of mutual respect and shared values when working with  
1157 individuals from other professions;
- 1158 • Understand the importance of promoting compassionate, ethical, and professional  
1159 relationships with patients and their families;
- 1160 • Understand how to create a communication environment that respects diversity  
1161 and cultural differences at all levels;
- 1162 • Understand the effects of health literacy and the diversity of patient education on  
1163 both patient health and the treatment of disease;
- 1164 • Learn the elements of effective inter-professional communication including respect  
1165 for all members of the healthcare delivery team;
- 1166 • Communicate with patients, families, communities, and other health professionals  
1167 in a manner that supports a team approach to the maintenance of health and the  
1168 treatment of disease;
- 1169 • Partner with supervising physicians, health care managers, and other health care  
1170 providers to assess, coordinate, and improve the delivery of health care and patient  
1171 outcomes.

1172  
1173 **Evidence of Compliance:**

- 1174 • Syllabi of required courses demonstrating that the curriculum addresses these  
1175 competencies with related objectives, teaching modules and evaluations;
- 1176 • Documentation of student evaluations that demonstrate achievement of the  
1177 competencies listed in this Standard;
- 1178 • Student essays that provide cohesive, convincing, professional arguments supporting a  
1179 particular viewpoint, with appropriate grammar, sentence structure and organization;
- 1180 • Evidence that students have developed sufficient oral presentation skills to convey  
1181 information effectively;
- 1182 • Satisfactory CoARC Graduate Survey results.

1183  
1184  
1185 **DA4.7 Practice-Based Research**

1186 As applicable, based on their professional goals, graduates must demonstrate proficiency  
1187 in evidence-based research suitable to their programmatic track, concentration, or  
1188 specialization. These competencies may include, but are not limited to, the ability to:

- 1189 • Conduct a systematic review of the literature to assess a particular subject, including  
1190 areas of consensus, inconsistency, and opportunities for further research;
- 1191 • Produce a scholarly annotated bibliography;
- 1192 • Use electronic communication technology (i.e. word processing, spreadsheets,  
1193 statistics and presentation software, file sharing software, webinar technology) to  
1194 conduct evidence based research;
- 1195 • Produce a scholarly work, including a cohesive structure, appropriate citations and  
1196 referencing;
- 1197 • Produce an abstract/poster presentation and defend it in a public forum;
- 1198 • Implement the elements of project management in a team environment;
- 1199 • Participate in a group setting to produce a clinical protocol related to the specialty;
- 1200 • Use the Scientific Method to formulate appropriate questions, organize and test

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 1201 hypotheses, and apply research results to the practice of respiratory care;  
1202 • Apply knowledge of study design and statistical methods to the evaluation of clinical  
1203 studies and other data related to diagnostic and therapeutic effectiveness;  
1204 • Develop a research project to assess an activity designed to enhance the  
1205 effectiveness of clinical practice.  
1206

1207 **Evidence of Compliance**

- 1208 • Syllabi of required courses with related objectives, teaching modules and evaluations,  
1209 demonstrating that the curriculum addresses these competencies;  
1210 • List of expected competencies related to this domain that are required for continued  
1211 professional practice;  
1212 • Student evaluations that demonstrate their achievement of the competencies  
1213 required to meet this Standard;  
1214 • Satisfactory CoARC Graduate Survey results.  
1215  
1216

1217 **DA4.8 Professional Leadership**

- 1218 When applicable, based on their professional goals, graduates must demonstrate  
1219 leadership attributes in their work environments. They should understand how to make  
1220 contributions to their professional communities and how to effect beneficial changes in  
1221 institutional policy, professional organizations and government. These competencies  
1222 may include, but are not limited to, the ability to:
- 1223 • Use information technology to manage information, access online medical  
1224 information, and support their own continuing education;
  - 1225 • Recognize and appropriately address: gender, cultural, religious, cognitive,  
1226 emotional and other biases; gaps in medical knowledge and physical limitations in  
1227 themselves and others;
  - 1228 • Facilitate the learning of students and/or other health care professionals;
  - 1229 • Understand the funding sources and payment systems that provide coverage for  
1230 patient care;
  - 1231 • Identify ways to lower the cost of healthcare delivery while maintaining quality of  
1232 care;
  - 1233 • Facilitate the arrival at a consensus which addresses the concerns of all stakeholders  
1234 through civil discussion;
  - 1235 • Understand how to manage a professional meeting including developing an agenda,  
1236 inviting participants, and using Robert's Rules;
  - 1237 • Use the internet, including email, blogs and networking sites, to interact with other  
1238 professionals;
  - 1239 • Demonstrate an ability to communicate effectively with legislators and lobbyists at  
1240 all levels of government;
  - 1241 • Increase the public's understanding of the Respiratory Therapy profession;
  - 1242 • Understand the organization, responsibilities and function of the major societies,  
1243 boards and commissions that affect/govern the specialty of Respiratory Therapy at  
1244 the state and national level.  
1245

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1246 Evidence of Compliance:

- 1247 • Syllabi of courses with related objectives, teaching modules and evaluations
- 1248 demonstrating that the curriculum addresses these competencies;
- 1249 • List of competencies related to this domain that are expected to be required for
- 1250 professional practice;
- 1251 • Documentation of student evaluations that the program has determined demonstrate
- 1252 their achievement of the competencies required to meet this Standard;
- 1253 • Satisfactory CoARC Graduate Survey results.

1254

1255

1256 **DA4.9 Professional Specialty Roles: Practicum**

1257 The typical degree advancement student is licensed, credentialed as an RRT, and  
1258 practicing as a Respiratory Therapist in a variety of medical settings including: hospitals,  
1259 clinics, sleep labs, pulmonary rehabilitation, and outpatient care to name a few. They are  
1260 often called upon to orient to new positions and practice in specialty settings that can  
1261 create fruitful academic learning experiences, when the experience is paired with  
1262 academic work under the supervision of a CoARC accredited DA Program. The new work  
1263 is performed under the student's license and credentials and is under the supervision and  
1264 auspices of the facility in which the student is performing the role. This activity would  
1265 occur in the absence of course work, so the elements of clinical supervision for an entry  
1266 level student do not apply. Types of activities might include, but are not limited to, the  
1267 following:

- 1268 • Transition to practice programs that include rotations in specialty areas of the
- 1269 hospital;
- 1270 • Orientation to specialty critical care units such as the NICU, Trauma ICU, and Neuro
- 1271 ICU;
- 1272 • Extra corporeal membrane oxygenator team;
- 1273 • Critical care transport;
- 1274 • Support of invasive pulmonology;
- 1275 • Pulmonary rehabilitation;
- 1276 • Pulmonary diagnostics;
- 1277 • Sleep Labs;
- 1278 • Management teams;
- 1279 • Clinical educator roles;
- 1280 • Care navigation roles; and
- 1281 • Clinical research coordinator.

1282

1283 Evidence of compliance:

- 1284 • Evidence of hospital facility support
  - 1285 ○ Communication from a direct supervisor that the academic work is approved and
  - 1286 under the auspices of the facility; or
  - 1287 ○ Affiliation agreement with the medical facility;
- 1288 • All professional practicum opportunities require a formalized written agreement
- 1289 between the student's employer and their corresponding educational institution. The
- 1290 agreement should clearly outline the responsibilities of both parties and provide

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 1291 transparency of student expectations and desired outcomes..
- 1292 ● Evidence of academic deliverables in the student record documenting the related
- 1293 academic activity. These might include, but are not limited to:
- 1294 ○ Evidence-based research on a topic related to the activity;
- 1295 ○ Annotated bibliographies;
- 1296 ○ Interviews with other professionals involved in the activity;
- 1297 ○ Case discussions and reviews with identifying patient information redacted;
- 1298 ○ Presentations of topics related to the activity;
- 1299 ○ Reflection papers on the experience;
- 1300 ○ Care plans; and
- 1301 ○ Patient education materials.

**Interpretive Guideline:**

*The intent of this Standard is to allow DA students the opportunity to link academic work in independent study to new roles in the work environment and sharing that experience with fellow students in the DA Program. This supports employers as many encourage their employees to advance their education, and linking the required orientation to credit within a DA Program encourages the students to pursue an advanced degree. This is beneficial to employee satisfaction and retention for the employer, degree advancement credit for the student, and a fruitful activity that is attractive to students and expands the horizons of other students in the DA Program. Many students would prefer this type of credit to a research track that culminates in a capstone or research paper. For programs with ESLOs that relate to leadership, advanced knowledge, communications, or evidence based research, the mastery assignments in a practicum could mirror mastery assignments in a research track and capstone.*

*The DA Program will need to keep records (electronic or paper) that document the evidence of compliance as outlined above.*

**Length of Study**

DA4.10 The program must ensure that the length of the program is commensurate with the degree awarded and sufficient for students to acquire the expected competencies.

Evidence of Compliance:

- Annual Report of Current Status accepted by CoARC, documenting student outcomes that meet program/CoARC thresholds;
- Surveys confirming the satisfaction of both faculty and graduates with the program;
- Curriculum outline for each program track in the academic catalog that documents the length of study required for graduation from the program and the degree conferred;
- Results of CoARC DA Student and Personnel Program Resource Surveys;
- Results of CoARC Graduate Surveys.

**Interpretive Guideline:**

*The intent of this Standard is to allow flexibility in the length of study while ensuring that*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1336 *the program still meets its stated goal(s). The curriculum may be structured to allow individual*  
1337 *students to achieve the competencies specified for their graduation from the program prior to the*  
1338 *expected completion date as well as to provide for students who require more time to complete*  
1339 *the program.*

1340  
1341

**Equivalency**

1342  
1343  
1344  
1345  
1346  
1347

DA4.11The program must ensure that course content, learning experiences, and access to learning materials are substantially equivalent for all students in a given track, regardless of location.

1348 Evidence of Compliance:

- 1349 • Documentation that students at various program locations have access to similar course
- 1350 materials, , and academic support services;
- 1351 • Results of CoARC DA Student Program Resource Surveys;
- 1352 • Program action plan and follow-up when results of these evaluations warrant
- 1353 intervention.

1354  
1355

**Interpretive Guideline:**

1356 *Regardless of the location of instruction, all curricular activities necessary for the*  
1357 *development of a competent graduate should result in comparable learning outcomes.*

1358

1359 *The program should document equivalency of both student evaluation methods and*  
1360 *outcomes when instruction is conducted at geographically distant locations and/or provided by*  
1361 *different instructional methods for a portion of the students in the program. Under these*  
1362 *circumstances, student access to learning materials should be sufficient to meet program goals*  
1363 *and similar at the various locations, but need not be identical.*

1364  
1365

**Disclosure**

DA5.1 All published information, such as web pages, academic catalogs, publications and advertising, must accurately reflect each respiratory care program offered.

Evidence of Compliance:

- Published program information documenting the program(s) offered.
- ESLOs listed on programmatic website for public view.

**Interpretive Guideline:**

*Sponsors and programs must provide clear and accurate information to stakeholders about all aspects of the program, including program options. Published information about the program must be accurate and consistent wherever it appears. Published information should be reviewed annually to ensure it is up-to-date and consistent with current CoARC Standards and Accreditation Policies.*

DA5.2 At least the following must be defined, published, and readily available to all prospective and enrolled students:

- a) The accreditation status of both the program and its sponsor (including consortium members where appropriate), along with the name and contact information of the accrediting agencies.
- b) Admission and transfer policies.
- c) Policies regarding advanced placement.
- d) All graduation requirements.
- e) Academic calendar.
- f) Academic credit required for program completion.
- g) Estimates of tuition, fees and other costs related to the program.
- h) Policies and procedures for student withdrawal, probation, suspension, and dismissal.
- i) Policies and procedures for refund of tuition and fees.
- j) Policies and procedures for processing student grievances.
- k) Description of expected student learning outcomes, curriculum map, and mastery assignments.

Evidence of Compliance:

- Published program information related to a-k above.

**Interpretive Guideline:**

*The intent of this standard is that clear and accurate program information be readily available to all stakeholders. CoARC Accreditation Policy 11.0 requires both sponsors and programs to provide the public with accurate information regarding the program's accreditation status and that current students and applicants be informed, in writing, of both the current status and any impending changes to that status. Publication of a program's accreditation status must*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1411 *include the program’s full name, mailing address and website address, its CoARC program number*  
1412 *and the telephone number of the CoARC. Programs with Provisional or Probationary Accreditation*  
1413 *must follow the specific disclosure requirements in Policy 11.0. If a program is in the process of*  
1414 *seeking accreditation from the CoARC, its publications must make no reference to accreditation*  
1415 *status.*

1416  
1417 *The program must clearly publish pre-requisites, co-requisites, minimum grade point*  
1418 *average, and required courses for each segment of the curriculum.*

1419  
1420 *The program director, in cooperation with appropriate sponsor personnel, should establish*  
1421 *admission procedures which are non-discriminatory. However, because enrollment is limited,*  
1422 *program admission criteria and procedures must ensure that the potential students are aware of*  
1423 *all admission requirements, including pre-requisite coursework, and that all students selected*  
1424 *have the potential to successfully complete the program.*

1425  
1426 *As additional evidence for its compliance with this Standard, the program may also include*  
1427 *information about ranking procedures or other criteria used for selection of applicants, minutes*  
1428 *from admissions committee meetings, periodic analyses supporting the validity of its admission*  
1429 *criteria and procedures, and sponsor research data that were used to establish admission criteria,*  
1430 *interpret admissions data and/or correlate these data with student performance.*

1431  
1432

**Public Information on Program Outcomes**

1433  
1434  
1435 DA5.3 A link to the CoARC published URL, where student/graduate outcomes for all programs  
1436 can be found, must appear on the website of all CoARC accredited programs.

1437  
1438 Evidence of Compliance:  
1439 ● The program’s web page showing the CoARC published URL.

1440  
1441 **Interpretive Guideline:**

1442 *The intent of this Standard is that outcomes information from all programs accredited by*  
1443 *the CoARC be readily available so that potential students can use this information to assess*  
1444 *programmatic quality when selecting a program. The program must publish on its web site (or*  
1445 *other program publications if no website is available) a link to the CoARC website*  
1446 *(<http://www.coarc.com/Students/Programmatic-Outcome-Data.aspx>) which provides outcomes*  
1447 *data for all accredited programs, along with the following statement explaining the link:*

1448  
1449 *The program must publish on its web site (or other publications readily available to*  
1450 *program applicants if no website is available) a link to the CoARC website*  
1451 *(<https://coarc.com/students/programmatic-outcomes-data/>) which provides outcomes data for*  
1452 *all its accredited programs, along with the following statement explaining the link:*

1453  
1454 *“CoARC accredits respiratory therapy education programs in the United States. To achieve*  
1455 *this end, it utilizes an ‘outcomes based’ process. Programmatic outcomes are performance*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1456 *indicators that reflect the extent to which the educational goals of the program are achieved and*  
1457 *by which program effectiveness is documented.”*

1458

1459

1460 **Non-discriminatory Practice**

1461

1462 DA5.4 All activities associated with the program, including personnel and student policies,  
1463 student and faculty recruitment, student admission, and faculty employment practices,  
1464 must be non-discriminatory and in accord with federal and state statutes, rules, and  
1465 regulations.

1466

1467 Evidence of Compliance:

- 1468 ● Academic catalog;
- 1469 ● Institutional/Program policies;
- 1470 ● Program’s technical standards.

1471

1472 **Interpretive Guideline:**

1473 *The catalog, website, and/or other published program information provided by the*  
1474 *program’s educational sponsor must include an official nondiscrimination statement and it must*  
1475 *be clear that the program adheres to all applicable non-discrimination policies related to faculty*  
1476 *employment and student admissions.*

1477

1478

1479 DA5.5 Student grievance and appeal procedures must include provisions for both academic and  
1480 non-academic grievances and a mechanism for evaluation that ensures due process and  
1481 fair disposition.

1482

1483 Evidence of Compliance:

- 1484 ● Program’s appeal policy and procedures;
- 1485 ● Record of complaints (if any) that includes the nature and disposition of each complaint.

1486

1487 **Interpretive Guideline:**

1488 *The sponsor’s procedure for filing and responding to student grievances must be clearly*  
1489 *stated, published and applicable/available to all students in the institution.*

1490

1491

1492 DA5.6 Faculty grievance procedures must be applicable to, and made known to, all faculty in the  
1493 program.

1494

1495 Evidence of Compliance:

- 1496 ● Sponsor’s faculty grievance policy and procedures.

1497

1498 **Interpretive Guideline:**

1499 *If the program has grievance policies in addition to those of the institution, the program*  
1500 *must document these and make them readily available to faculty.*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

- 1501  
1502  
1503 DA5.7 Programs granting advanced placement must publish criteria for such placement and  
1504 have documentation confirming that students receiving advanced placement have:  
1505 a) Met program defined criteria for such placement;  
1506 b) Met sponsor defined criteria for such placement; and  
1507 c) Provided evidence confirming their competence in the curricular components for  
1508 which advanced placement is given.  
1509

1510 Evidence of Compliance:

- 1511 ● Program policies and procedures related to advanced placement;  
1512 ● Documentation for all students receiving advanced placement, including confirmation of  
1513 course equivalency.  
1514

**Interpretive Guideline:**

*This Standard is only applicable to programs that offer advanced placement. Program criteria for granting advanced placement may differ from course to course. Program documentation for students granted advanced placement must include all the competencies assessed for the granting of such placement, those competencies for which advanced placement was granted and subsequent student performance in the program.*

*Programs that do not accept prior respiratory care education or work experience in lieu of required respiratory care course work and/or do not offer advanced placement should communicate this in published program information.*

**Academic Guidance**

- 1527  
1528  
1529 DA5.8 The program must ensure that all students, regardless of location of instruction, have  
1530 timely access to faculty and academic support services for assistance regarding their  
1531 academic concerns and problems.  
1532

1533 Evidence of Compliance:

- 1534 ● Program/institutional policies and procedures;  
1535 ● Documentation of advising sessions;  
1536 ● Published schedules of faculty office hours;  
1537 ● CoARC DA Student Program Resource Surveys.  
1538

**Interpretive Guideline:**

*Academic support services are those services available to the program that help faculty and students, in any teaching/learning modality including distance education, achieve the expected outcomes of the program. These may include, but are not limited to, library, computer and technology resources, as well as advising, counseling, and placement services.*

*The intent of this Standard is that programs should provide developmental guidance for all students who need help with academic problem/concerns, personal/social concerns and career*

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1546 awareness. Guidance may be provided by individual and group counseling as well as classroom  
1547 guidance lessons. There should be both formal and informal mechanisms in place for student  
1548 mentoring and advocacy. The role of the program faculty in academic advisement and counseling  
1549 should be defined and disseminated to students, and faculty should ensure that they are available  
1550 when scheduled for such sessions.

1551  
1552  
1553 **Student and Program Records**  
1554

1555 DA5.9 The program must maintain student records, including student evaluations, securely,  
1556 confidentially, and in sufficient detail to document each student's learning progress,  
1557 deficiencies and achievement of competencies. These records must remain on file for at  
1558 least five (5) years, whether or not the student ultimately completes all requirements for  
1559 graduation.

1560  
1561 Evidence of Compliance:

- 1562 ● Hard copy or electronic records of the following:
  - 1563 a) Proof that the student met applicable published admission criteria;
  - 1564 b) Student evaluations;
  - 1565 c) Records of remediation;
  - 1566 d) Records of disciplinary action;
  - 1567 e) Official transcripts.

1568  
1569 **Interpretive Guideline:**

1570 *The intent of this Standard is to ensure that programs maintain student records for at least*  
1571 *five calendar years. Student records should include copies of all admission and acceptance letters,*  
1572 *enrollment agreements and records documenting that the matriculated student has met program*  
1573 *admission requirements. Programs that offer conditional acceptance must also provide records*  
1574 *of such conditions. Records of student evaluations should be retained in sufficient detail to assess*  
1575 *their progression toward achievement of program requirements. Unauthorized individuals,*  
1576 *including students, should not have access to confidential information of other students or faculty.*  
1577 *Programs should check with their sponsor and its accreditor for policies or Standards that may*  
1578 *require a longer time frame.*

1579  
1580 *Documentation of student evaluation must include copies of each evaluation instrument*  
1581 *(e.g. exams, assignments, and lab and clinical competency check-offs) and each student's score*  
1582 *on each of these instruments (e.g. grade book or other records demonstrating competency).*  
1583 *Maintaining a single copy of each evaluation instrument and then a spreadsheet grade book*  
1584 *showing individual scores is sufficient evidence for compliance.*

1585  
1586  
1587 DA5.10 Program records must provide detailed documentation of program resources and  
1588 achievement of program goals, outcomes on mastery assignments for ESLOs, and  
1589 surveys. These records must be kept for a minimum of five (5) years.  
1590

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1591 Evidence of Compliance:

- 1592 ● Hard copy or electronic records of the following:
- 1593 a) CoARC DA Graduate Surveys;
  - 1594 b) CoARC DA Student and Personnel Program Resource Surveys;
  - 1595 c) Course syllabi;
  - 1596 d) Clinical affiliate agreements and schedules (if applicable);
  - 1597 e) Advisory Committee meeting minutes;
  - 1598 f) Program faculty meeting minutes;
  - 1599 g) Current curriculum vitae of program faculty;
  - 1600 h) Student files with ESLO mastery assignment outcomes;
  - 1601 i) Records of program outcomes (Annual RCS, etc.).
- 1602

**Interpretive Guideline:**

*Program records must be kept for at least five calendar years. Programs should check with their institution and its accreditor for policies or Standards that may require a longer time frame. CVs of faculty must be updated at least annually.*

1604  
1605  
1606  
1607  
1608

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

1609 **APPENDIX A – GLOSSARY**

1610

1611 Throughout the Standards, terms that have specific definitions are noted below.

1612

1613 **NOTE:** Where terms are not defined, their definitions are at the discretion of the CoARC.

Academic Catalog	An official publication that describes the academic programs and courses offered by the institution. This may be published electronically and/or in paper format.
Academic Policies	Published rules that govern the operations of academic programs including, but not limited to, policies related to admission, retention, progression, graduation, grievance, and grading.
Academic Support Services	Services available to the faculty and students in all programs offered by the institution, applicable to any teaching/learning format, including distance education, which help programs achieve their expected outcomes. These include, but are not limited to, library, computer and technology resources and advising, counseling, and placement services.
Accurately	Free from error.
Action Plan	A plan developed to address a problem (outcomes, resources) in such a way that progress towards the solution can be determined. At a minimum, an action plan should include methods, evaluation criteria and benchmarks, expected goals or outcomes, and timely re-assessment.
Adequate	Allows the program to achieve its goals and outcomes.
Administrative and Clerical Support Staff	Administrative and clerical personnel provided to programs by their sponsor.
Advanced placement	A term used in higher education to place a student in a higher- level course based on an evaluation of the student’s existing knowledge and skills. Similar terms include: advanced standing, prior learning, prior coursework, and credit for life experiences.
Affiliate (Clinical)	Institutions, clinics, or other health settings not under the authority of the sponsor that are used by the program for clinical experiences.
Affiliation Agreement	A legally binding contract between a program’s sponsor and a clinical site providing all details of the interaction and the rights and responsibilities of both parties. The agreement must be signed by administrative personnel who have the legal authority to act on behalf of the involved parties. A memorandum of understanding is slightly different but does the same thing.
Annual Report of Current Status (RCS)	A report in a format mandated by CoARC, providing current information regarding personnel, satellite, clinical affiliates, enrollment/retention data and outcomes data from the prior academic year.
Appropriately Credentialed	Refers to an individual associated with a program who has the practice credential(s) (i.e., a state license, state certification or state registration) required to practice his/her specific health care or

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

	medical profession within the state housing the program. Appropriate credentialing is required for all program Key Personnel and for instructional faculty, whether or not the individual is in current practice.
Assessment	The systematic collection, review, and use of information to evaluate student learning, educational quality, and program effectiveness.
Base Program	When a program sponsor has established a satellite program in addition to the original program, the base program is the one where the Key Personnel are based.
Consortium	A legally binding contractual partnership of two or more institutions (at least one of which is a duly accredited degree-granting institution of higher education) established to offer a program. Consortia must be structured to recognize and perform all the responsibilities and functions of a program sponsor.
Clinical education experiences	The acquisition of required clinical competencies in a patient care setting under the supervision of a qualified instructor.
Communities of Interest	Groups and individuals with an interest in the mission, goals, and expected outcomes of the program and its effectiveness in achieving them. The communities of interest include both internal (e.g. current students, institutional administration) and external constituencies (e.g. prospective students, regulatory bodies, practicing therapists, clients, employers, the community/public) constituencies.
Competent	The level of skill displaying ability or knowledge derived from training and experience.
Competencies	The measurable set of specific knowledge, skills, and affective behaviors expected of program graduates.
Continued Professional Growth	Maintenance and/or enhancement of faculty expertise using activities such as specialty certification or recertification; continuing education; formal advanced education; other scholarly activities such as research or publications.
Credential	Refers to a practice credential (i.e. a state license, state certification or state registration) that is required for the individual to practice his/her specific health care or medical profession within the state housing the program. Where indicated, an appropriate credential is a required qualification of the program director, the director of clinical education, and instructional faculty whether or not the individual is in current practice.
Critical Thinking	Active and reflective reasoning that integrates facts, informed opinions and observations to explore a problem and form a hypothesis and a defensible conclusion. Accordingly, critical thinking transcends the boundaries of formal education.
Curriculum	Formally established body of courses and/or supervised practice rotations and learning experiences presenting the knowledge, principles, values and competencies offered by a program.
Distance Education	Education that uses one or more technologies (i.e., internet,

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

	telecommunication, video link, or other electronic media) to deliver instruction to students have no physical access to the instructor and to support regular and substantive interaction between the students and the instructor, either synchronously or asynchronously. CoARC does not allow clinical education or the participation in clinical experiences to be delivered in a distance education format.
Equivalent	Comparable to.
Expected Student Learning Outcomes (ESLOs)	Assessment of the results of the educational process; a determination of the extent to which student skills are consistent with the goals of the program.
Faculty (Program)	The aggregate of individuals responsible for the design, implementation, instruction, and evaluation of the program and its curriculum. In addition to Key Personnel, these individuals include all respiratory care program instructors who are employees of the program.
Faculty (Clinical)	Individuals who teach, supervise, or evaluate students in a clinical setting but who are not program faculty.
Faculty, Individual/ Full-Time	An employee of the program sponsor, assigned to teach the respiratory care program, who holds an appointment considered by that institution to be full-time.
Goals	Aims of the programs that are consistent with sponsor and program missions and reflect the values and priorities of the program. Should a program decide to pursue an additional goal, it must develop a valid and reliable measurement system to assess its success in achieving this goal.
Graduation Date	The official date of graduation is the date that is posted by the registrar on the student's transcript.
In-depth	Thorough knowledge of concepts and theories for the purpose of critical analysis and the synthesis of more complete understanding
Institutional Accreditation	Pertains to the academic sponsor of the program. Signifies that the institution as a whole is attaining mandated objectives in a manner acceptable to the institution's accreditor.
Instructional Faculty	Individuals providing instruction or supervision during the didactic and clinical phases of the program, regardless of faculty rank or type of appointment.
Inter-rater reliability	A measure of the extent to which raters agree during evaluation of the same thing.
Learning Environment	Places, surroundings or circumstances where knowledge, understanding, or skills are acquired such as classrooms, laboratories and clinical education settings.
Learning Experiences	Curricular activities that substantially contribute to the development of a competent graduate. Also referred to as educational experiences.
Length of Study	Duration of the program. May be stated as total time (academic or calendar year(s)), or as the number of semesters, trimesters, or quarters.

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

Mission	A purpose statement defining the unique nature and scope of the sponsoring institution or the program.
Must	Indicates an imperative.
Objectives	Statements specifying knowledge, skills, or behaviors to be developed as a result of educational experiences. Objectives must be measurable.
Outcomes	Results, end products, or effects of the educational process. Outcomes include what the students demonstrated/accomplished and what the program achieved.
Outcomes Assessment	Comprehensive process for evaluating the results of programmatic efforts and student learning.
Outcome Assessment Thresholds	National, statistically based expectations for graduate success established by CoARC including pass rate on the credentialing examinations, attrition, job placement, graduate satisfaction, and on-time graduation rate.
Practicum	Paid clinical experience by a licensed and/or locally credentialed Respiratory Therapist at their place of employment that is linked to defined academic work for college credit, as experiential learning/independent study.
Professional Development	Activities that facilitate maintenance or enhancement of faculty expertise such as: specialty or recertification; continuing education; formal advanced education; research, publications, and other scholarly activities.
Professional Service	Academically-centered community service, based on the concept of service-learning or community-based learning. Service-learning is a structured learning experience that combines community service with preparation and reflection. Students engaged in service-learning provide community service in response to community-identified concerns (e.g. smoking cessation, COPD screening, etc.) and learn about the context in which service is provided, the connection between their service and their academic coursework, and their roles as citizens.
Proficient	A level of skill beyond competency acquired through advanced training or when a particular activity is repeated frequently; a more efficient utilization of time to complete a process.
Program	An organized system designed to provide students with the opportunity to acquire the competencies needed to participate in the respiratory care profession; includes the curriculum and the support systems required to implement the sequence of educational experiences.
Program Outcomes	Performance indicators that reflect the extent to which the goals of the program are achieved and by which program effectiveness is documented. Outcomes include but are not limited to: program completion rates, job placement rates, certification pass rates, and program satisfaction.

**ACCREDITATION STANDARDS FOR  
DEGREE ADVANCEMENT (DA) PROGRAMS IN RESPIRATORY CARE**

Program Improvement	The process of utilizing results of assessments and analyses of program outcomes to validate and revise policies, practices, and curricula as appropriate.
Progress Report	The program response to an official inquiry from CoARC related to one or more specific deficiencies. The response must clearly describe how the program has addressed deficiencies (the action plan) and both how and when it will determine the effectiveness of the plan.
Prospective Students	Individuals who have requested information about the program or submitted information to the program.
Published	Made publicly available in written or electronic format.
Readily available	Made accessible to others in a timely fashion via defined program or institution procedures.
Remediation	The program's defined process for addressing deficiencies in a student's knowledge and skills, so that the correction of these deficiencies can be ascertained and documented.
Resource Assessment Matrix (RAM)	A document developed by the CoARC that programs must use for on-going resource assessment. The matrix evaluates all mandated resources in a set format which includes: purpose, measurement system, dates of measurement, results and analysis, action plans and follow-up.
Sponsor	A post-secondary academic institution, accredited by an institutional accrediting agency recognized by the U.S. Department of Education (USDE), or a group of institutions (consortium-see previous definition), that is/are responsible for ensuring that its program meets CoARC Standards.
Standards	The Accreditation Standards for Degree Advancement Programs in Respiratory Care as established by the CoARC from time to time.
Student	A graduate of a CoARC-accredited entry into respiratory care professional practice degree program who is enrolled in a CoARC-accredited degree advancement respiratory care program.
Substantive change	A significant modification of an accredited program. The process for reporting substantive changes is in the CoARC Accreditation Policies and Procedures Manual.
Sufficient	Adequate to accomplish or bring about the intended result.
Teaching and Administrative Workload	Quantification of faculty responsibilities. Categories frequently used are teaching, advisement, administration, committee activity, research and other scholarly activity, and service/practice.
Technical Standards	The physical and mental skills and abilities needed to fulfill the academic and clinical requirements of the program. The standards promote compliance with the Americans with Disabilities Act (ADA) and must be reviewed by institutional legal counsel.
Timely	Without undue delay; as soon as feasible after due consideration.
Understanding	Adequate knowledge with the ability to apply appropriately.

1614  
1615
